FD-3 Abstract

25X1A

MATERIAL REQUIREMENTS AND ORDERS AT KARL LIEBKNECHT TRANSFORMER PLANT (26 pp; German; dated

25X1A

This document consists of typewritten correspondence dealing with the Karl Liebknecht Transformer Plant in Berlin-Oberschoeneweide, which is a VEB (People-Owned Enterprise) belonging to the VVB VEM (Federation of People-Owned Enterprises for Electrical Machine-Building), as follows:

1) Letter, dated 12 September 1951, from the Liebknecht Transformer Plant to the Main Administration for Electrical Products, Ministry of Machine-Building, which reports on the status of an order, placed by the Stassfurt Soda Factory, VVB "Alkali", for two transformers.

2) Letter, dated 12 September 1951, from the Liebknecht Transformer Plant to the Main Administration for Electrical Products, Ministry of Machine-Building, in which the former describes the specifications of the dynamo sheet-iron it uses in production.

3) Letter, dated 30 August 1951, from the Liebknecht Transformer Plant to the Main Administration for Electrical Products, in which the former states that it will submit a report on the earliest dates it can deliver its September and October export orders.

4) Letter, dated 30 August 1951, from the Liebknecht Transformer Plant to the Main Administration for Electrical Products, in which the former states that, as a result of the critical shortage of materials, it cannot fill an order involving the export of 157 switchboards to Poland, on schedule unless other orders are deferred.

5) Memo, dated 22 August 1951, prepared by the Main Administration of Electrical Products, which concerns a conference with the production management of the Liebknecht Transformer Plant on 22 August 1951. A description is given of the various types of lists, dealing with the status of orders, delivery dates for orders, and material requirements, which are to be submitted by the Liebknecht Transformer Plant.

Return to CIA Library

6) Detailed lists, dated 27 August 1951, compiled by the Liebknecht Transformer Plant, of the material requirements of the plant. The first list is in tabular form and is set up under the following headings: a) plan position number; b) designation of material (medium plate, drawn bar-steel, tubes, etc.); c) planned requirements; d) allocations approved; e) of (d), the amount to be procured in the GDR; f) of (d), the amount to be obtained through import; g) quantity received as of 20 August 1951; h) quantity for which specifications have not yet been given. The remainder of the lists involves a breakdown of each of the materials, according to plan position number; individual quantities are given for the various types of each material. The unit of quantity is usually expressed in terms of tons, but is sometimes given in kilograms.

Foreign language document or microfilm of it (No. A-10431) is available from CIA library, ext.
